Sec. 26-64. Measurement procedures.

The measurement of sound or noise pursuant to this section shall be as follows:

- (1) The measurement of sound or noise shall be made with sound level meters Type 1 or Type 2 which meet the standards prescribed by the ANSI. The instruments shall be maintained in calibration and good working order. A calibration shall be made of the system at the time of any noise measurement. Measurements recorded shall be taken so as to provide a proper representation of the noise source. The microphone during measurement shall be positioned so as not to create any unnatural enhancement or diminution of the measured noise. A windscreen for the microphone shall be used when required. A minimum of three (3) sound level readings will be taken. The geometric mean of these readings will be used as the average sound level. If the background noise is equal to the levels set forth in section 26-62 above, three (3) dB shall be subtracted out of the average sound level.

The slow meter response of the sound level meter shall be used to determine that the average amplitude has not exceeded the dBA readings or the limiting noise spectra set forth in section 26-62 above.

Unless otherwise specified, the measurement shall be made at the property boundary on which such noise is generated, or at any point within the receiving property affected by the noise.

Sec. 26-65. Exemptions from article.

Exemptions from the provisions of this chapter may be granted in accordance with the requirements below.

- (1) Any person responsible for any noise from the operating of any equipment used in construction, repair, alteration or demolition work on building structures, alleys or appurtenances thereto shall apply to the director for an exemption or partial exemption from the provisions of this chapter. All other requests for exemptions shall be directed to the chief. The director or the chief may grant such exemption or partial exemption if he finds that:
 - a. The noise does not endanger the public health, safety or welfare; or

- b. Compliance with the provisions of this chapter from which an exemption is sought would cause a serious hardship without producing equal or greater benefit to the public.
- (2) In determining whether to grant such exemption the director or chief shall consider the following:
- a. The time of day the noise will occur;
 - b. The duration of the noise;
 - c. The loudness of the noise in relation to the maximum permissible sound levels set forth in section 26-62 of this chapter;
 - d. Whether the noise is intermittent or continuous; and
 - e. Such other matters as are reasonably related to the impact of the noise on the health, safety and welfare of the community and the degree of hardship which may result from the enforcement of the provisions of this chapter.
- (3) Exemptions or partial exemptions issued pursuant to this section shall be granted for such period as the director or the chief made pursuant to this section may obtain review of such decision by the town manager or his authorized agent by delivering a written statement of appeal to the office of the town manager within ten (10) days of the date of the decision. The town manager shall review all statements of grievances and shall, within ten (10) days after receipt of such written statement of grievance, either affirm or set such decision aside, and make any such further determination as may be necessary to effectuate the provisions of this section. The decision of the town manager shall be final and binding.

Sec. 26-66. Issuance of permits

The town manager shall be authorized to issue permits to persons allowing the production of noise that might otherwise be prohibited under this article, provided that such permits shall be limited to a specific event, time period, or activity. Such permits shall be issued in accordance with regulations promulgated by the town manager and published in the town administrative manual.
